1. The IDS has been considered.
2. The disclosure is objected to because of the following informalities: The Serial No. of the copending application, noted on page 1 of the specification, must be supplied.

Appropriate correction is required.

3. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:
It does not identify the citizenship of each inventor.

The citizenship of the fourth inventor is not legible.

4. Claims 15-23 are allowed.
5. Claims 2-5,9,13,14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2651

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1,6-8,10-12 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent Application Publication No. 2002/0192506, hereinafter "Coffey".

The applied reference has a common inventor with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Coffey shows a magnetic recording disk drive (Fig. 1) comprising a magnetic recording disk 112 having upper and lower ferromagnetic layers 306 and a nonferromagnetic spacer layer 308, an inductive write head 202, and a heater 206.
